# BRANO GROUP QUALITY POLICY

**Our biggest goal is to achieve the world-class quality of our products and services with regard to development and needs of all interested parties.**

## Vision:

BRANO GROUP is a go-getting, successful company, which is one step ahead of its competition and one step closer to its customers.

## Continual improvement includes:

- Improvement of quality of our products and services
- Increase of effectivity of processes and of all quality management system
- Reduction of costs without reducing the quality
- Technical innovation and improvement of infrastructure
- Increase customer satisfaction and satisfaction of all interested parties

## To increase the speed of growth of continual development, the company management undertakes to:

1. Fulfil the requirements of current and also potential customers and to be competitive.
2. Motivate the employees to continual improvement of products and process effectivity and quality management system effectivity in accordance to the company 5x5 strategy.
3. Understand the growth of qualifications as a never-ending process during which a special attention is paid to responsibility for product, product safety, team work and work safety.
4. Focus on improvement and on loss prevention especially in pre-production stages and when needed. Implement team work whenever possible.
5. Strongly cooperate with suppliers to ensure the highest possible quality of purchased materials, services and all other inputs.
6. Think of fulfillment of ISO9001 and IATF16949 requirements as of key requirements for the quality management system.
7. Inform the employees about company goals, current issues and results of quality assurance. Put emphasis on process improvement and work without errors.
8. Cooperate with the government administration and submit information about the company in the scope, timing and quality which is in accordance to law.
9. Provide and distribute necessary resources for workers and for their work, which is under their responsibility.
10. Create such work environment that is positively influences fulfillment of quality requirements and positive fulfillment of the company goals.
11. Understand that process management is series of inter-connected activities.
